

Appliqué at the Machine with Creative DRAWings®!

Supplies:

Schmetz Gold Titanium Needle available in sizes 75 and 90
MegaSheen Embroidery Thread
Fabric used for the Appliqué
Appliqué Scissors
Temporary Sticky Spray

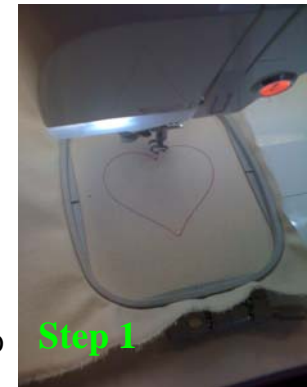

1. The first thing that will embroider is our heart running stitch. This will show us where our Appliqué Fabric is going to go.

2. Spray a small amount of sticky spray on your heart that's in your hoop. **You will want to take off your hoop to do this, we don't want to get sticky spray on the machine!** Then press your appliqué fabric over the sticky spray so it covers our heart running stitch.

3. The next thing that will embroider out is our second running stitch. This will tack down our appliqué fabric to our project.

4. Now carefully remove the hoop from your machine. Use your appliqué scissors to cut away the excess fabric. Be careful not to cut into the design.

5. Now we will embroider our satin stitch. This stitch will cover up the edge of the fabric and give it a clean look.

6. Last thing that is left is the lettering. Change your thread color to white and finish the design.
